RESULTS TAKING CENTER STAGE

MEASUREMENT MODULE
“WHEEL DIAMETER“
Data sheet
APPLICATION

The “Wheel diameter” module allows for the precise measurement of the rail vehicle wheel diameter. The flange diameter is measured in order to calculate the rolling circle diameter. Additionally, the following values can also be calculated automatically: diameter difference axle, diameter difference bogie and diameter difference coach.

The wheel diameter gauge (D-Gauge) is used to perform the measurement and is included in this module offering. The patented gauge is robust, has no moveable components and can be easily mounted (switchable magnet) on the wheel. A measurement can be performed quickly and easily on the installed wheel, even in difficult conditions.

All of the measured variables are displayed on the sensor and tablet PC within a few seconds. These results can then be compared automatically with your reference values.

MEASURED VARIABLES:

DS – Flange diameter
Dlk – Rolling circle diameter
DDA – Diameter difference axle (n)
DDD – Diameter difference bogie (e)
DDW – Diameter difference coach
TECHNICAL DATA

Depending on your wheel diameter dimensions, you can choose between three different D-Gauge versions.

**Accuracy**
Absolute accuracy: < ± 200 μm  
Repeatability: < ± 100 μm

**System requirement**  
Measurement module “WheelProfi”

**Compatibility**  
CALIPRI C41, CALIPRI C42

**Standards & certificates**
Calipri is approved and uses i.a. in Germany (DB), Austria (ÖBB), Switzerland (SBB), France (SNCF), China (Chengdu Railway Bureau) and the Czech Republic (SZDC).
This measuring module has been successfully tested according to JCGM100: 2008, DIN V ENV 13005: 1999-06, DIN EN 13715: 2001-01, DIN EN 15313: 2016-09 and DIN 27201-9: 2017-06.

*Refers to the flange diameter.

SCOPE OF SUPPLY AND SERVICES:

✔ Software license measurement module “Wheel Diameter“
  - 1 measurement method (FlangeDiameter)
  - In case of supplementary order:
    Activation via remote access

✔ Wheel diameter gauge (D-Gauge) incl. calibration certificate
  - Mechanical supporting gauge for the wheel diameter measurement
  - USB stick with the gauge calibration specifications included
  - Delivered in hard shell case for the purpose of shipment and storage

ADD-ON
“D-Gauge modification“

- Additional magnet (permanent magnet) for a better adhesion
- Product ID: CSM9001
